

# Mystery Drum

## 10 Steps to a Safe and Healthy Hazardous Chemical Spill Response

A chemical spill in a processing plant causes smoke to rise from the sump drain. A worker in the area sounds the alarm and heads for the emergency exit. As the HAZMAT team leader, what will you do?

*Mystery Drum* provides a 10-step process for responding to chemical spills. It delivers in-depth instruction on each step:

**Clearing the area and checking for injuries**

**Reporting the incident**

**Securing the area**

**Identifying the spilled material**

**Identifying the hazards associated with the spill**

**Selecting proper Personal Protective Equipment**

**Developing a response plan**

**Containing and controlling the spill**

**Cleaning up the spill area**

**Decontaminating**

### Talk to workers

Here are some workers who have information related to the spill. Listen to each of them.

USE ARROW KEYS TO CHOOSE A WORKER, THEN ENTER TO LISTEN.

### Continual decision points engage the user's attention.

New Leaf Interactive Media's DVD training products have continual decision points, which require the user to assess the situation, make good choices, and resolve the problem safely.

These training products have been developed in collaboration with the Hazardous Materials Training Research Institute, a leader in safety training. Each DVD includes:

**A video scenario** which sets the stage for the training

**In-depth safety training** to prepare the user to resolve the problem

**Exercises and quizzes** which test the user's comprehension

**Problems and pressures** in the workplace which could affect the outcome

### DVD is an excellent training medium.

DVD-video delivers quality video and simple interactivity, on an inexpensive platform that has been widely adopted in homes, schools, and training centers.

### Navigation is simple.

Use the Up, Down, Left and Right arrows on your video remote to navigate menus. Use the Enter key to make choices.

On a personal computer, just point and click.

### This DVD doesn't require a computer.

For individual use, New Leaf's DVDs require only a consumer DVD player connected to a television. For use in the field, instruction can be delivered on an inexpensive portable DVD player. For classroom and group use, connect a DVD player to a projection system.

Of course, the DVDs will also play back on DVD-capable Windows and Macintosh computers.

A collaboration between New Leaf Interactive Media, Inc., and the Hazardous Materials Research & Training Institute at Kirkwood Community College, Cedar Rapids, IA.
